Dear Jon,

The Yakutat Regional Aquaculture Association (YRAA) has been testing water flow and quality in several locations around Yakutat for many years to try and find the best location to develop a hatchery site in Yakutat. One of the areas investigated we believe is on City property at Puget Cove. We are now at the stage that we would like to confirm boundaries of the City property at Puget Cove. The sites we were testing water flow are at the following locations:

Puget Cove Spring A	N 59.55 949 & W 139. 70 978
Puget Cove Spring A.1	N 59. 55 890 & W 139. 70 969
Puget Cove Spring B & C	N 59. 55 882 & W 139. 70 926

A map that shows any City property near these locations would be extremely helpful as well as confirmation that these springs are located on City property. We are attaching a map of the location of the springs we were testing.

Thank you for your help and support as we have been working on this project. Please feel free to call if you have any questions about the information that we are looking for.

Sincerely,

A handwritten signature in black ink, appearing to read "Kathy Hansen", followed by a long horizontal flourish line extending to the right.

Kathy Hansen
